## ACTIVITY

---

Through its commercial brand, Itac Professional, Importaco focuses its activity on clients from the ingredients sector and food service industry, with a wide offer of products endorsed by the strictest certifications.

Our product range, consisting mainly of nuts and dried fruit, is carefully transported from origin, ensuring that the process is compliant with all the food safety regulations. We also have a production plant where we process all our nuts and prepare nut and dried fruit mixes, as requested by our clients, so that they can then use them to manufacture their own products.

Of special interest is our processed almond plant, in which we only work with this raw material. There, we make blanched almonds, laminated almonds, almond sticks, almond cubes and almond flour.

Importaco Food Service S.L. has a large sales team that operates in all parts of Spain, providing our clients with customised service and ensuring rapid, fresh product placement.

## QUALITY AND CERTIFICATION

---

Importaco Food Service S.L. is committed to ensuring and guaranteeing quality and food safety in all the products it sells. With this objective, we have implemented the following management systems:

Quality management: Certified to ISO9001:2008.

Food safety: Implementation of a HACCP food safety system.

We also hold the IFS and BRC Food Safety certifications.

Our facilities have analytical and quality control laboratories, as well as a technological centre dedicated to research and innovation.

## IMPORTACO AND THE COUNTRY

---

Importaco Food Service starts with the first link in the value chain of its products to guarantee the highest quality. To that end we have a specialised team that offers advice to our producers directly, in the field, and in each of the different regions of the peninsula, at all times seeking to comply with our standards in a sustainable manner and providing solutions and working in close collaboration with our producers.

We also conduct ongoing studies of the sector, analysing and validating each of our product varieties together with our R&D department. Our producers follow the premises of good farming practices, guaranteeing maximum safety, traceability and quality in the finished product.

## SOCIAL RESPONSIBILITY

---

Working to include sustainability criteria in all our actions, striking a balance between economic and social progress and protecting the environment is one of the goals of Importaco Food Service.

We believe our activities must serve to generate new opportunities and contribute to sustainable development in all the areas in which we operate.
